Department of Toxic Substances Control Project Status Update for Former Wyle Laboratories Norco Facility Site July 9, 2007

PROJECT ACTIVITIES

- DTSC is overseeing the second round of indoor air sampling at 27 homes on Golden west Lane, Third Street, Buckboard Lane and Hillside Avenue. DTSC is also collecting duplicate indoor air samples at selected homes for project quality assurance/quality control (QA/QC) purposes. The sampling will be completed at the end of July.
- DTSC approved a Hydraulic Containment System (HCS) Technical Memorandum (TM) on July 3, 2007. The TM is prepared to include a proposal to implement interim HCS to be installed in the Northwest Area. The proposal is based on the Bedrock Study completed in May 2006 and results of Preliminary Aquifer Pumping and 2-PHASETM Extraction Pilot Testing conducted in February 2007. DTSC required Wyle to prepare this TM since groundwater impacted with trichloroethylene (TCE) has migrated offsite from the Northwest Area and it is necessary that any further migration of TCE-impacted groundwater be contained and controlled. As part of this approval, DTSC also required Wyle that the existing National Pollution Discharge Elimination System Permit, issued by Santa Ana Regional Water Quality Control Board, be amended to include N-nitrosodimethylamine requirements.

ACTIVITIES COMPLETED LAST WEEK

Onsite:

- Continued third quarter routine quarterly sampling;
- Continued drilling holes in the Northwest Area as part of additional bedrock evaluation;
- Conducted operations and maintenance (O&M) activities for soil vapor extraction system and sampling at permanent probes on Golden west Lane;

Offsite:

- Continued third quarter routine quarterly sampling;
- Continued second round of indoor air sampling at 27 homes;

ACTIVITIES PLANNED FOR THIS WEEK

Onsite:

- Continue drilling holes associated with additional bedrock evaluation in the Northwest Area;
- Continue third quarter routine quarterly sampling;
- Continue O&M activities for soil vapor extraction system;

Offsite:

- Continue third quarter routine quarterly sampling;
- Continue second round of indoor air sampling at 27 homes;

ADDITIONAL ACTIVITIES PLANNED FOR JULY

- Install sub-slab depressurization system at Buckboard Lane home;
- Conduct sub-slab sampling at Norco High School, Science Building;
- Conduct indoor air and sub-slab soil gas sampling at Buckboard Lane home;

PUBLIC PARTICIPATION:

- None to report;
